

SYED HASNAIN PEERAN

+91-8639004735 | iamsyedhasnain04@gmail.com | [Portfolio](#) | [LinkedIn](#) | [LeetCode](#) | [SmartInterviews](#) | [GitHub](#)

Final-year Computer Science (Machine Learning) undergraduate (graduating 2027) with strong problem-solving fundamentals (250+ LeetCode problems solved) and hands-on software engineering experience across backend development and applied ML — from FastAPI backends to CNN-based image similarity search and language-model benchmarking.

EDUCATION

G. Pulla Reddy Engineering College, Kurnool

Aug 2023 – 2027

Bachelor of Technology, Computer Science and Engineering (Machine Learning) | CGPA: 8.74/10

Narayana Junior College, Kurnool

Jul 2021 – Mar 2023

Intermediate (MPC – Maths, Physics, Chemistry)

TECHNICAL SKILLS

- **Languages:** Python, Java, SQL
- **Backend/Web (Familiar):** Node.js, Express.js, FastAPI
- **Frontend (Familiar):** React, Vite
- **AI/ML:** scikit-learn, TensorFlow, PyTorch, Reinforcement Learning, QUBO/Quantum-Inspired Optimization
- **Tools & Platforms:** Git/GitHub, Streamlit, FAISS, Linux, Jupyter, VS Code

INTERSHIPS

ML Intern, FlyRank

Jul 2026 – Sep 2026

- Built a content opportunity scoring pipeline using binary classification, applying precision@K as the evaluation metric; audited training data for label leakage and anomalies to safeguard prediction reliability.

Intern, Intel Unnati

Dec 2025 – Jan 2026

- Built an image similarity system using CNN-based feature extraction to generate embeddings from image datasets.
- Implemented FAISS for fast similarity search on high-dimensional image embeddings to improve retrieval efficiency.
- Designed a nearest-neighbor recommendation system to suggest visually similar images based on embedding distance.

Intern, Infosys SpringBoard (Virtual)

Oct 2025 – Dec 2025

- Developed a rule-based chatbot with a TF-IDF/cosine-similarity recommendation module to automate query handling and suggest relevant content.

PROJECTS

WESD Optimizer — Winner, Datathon 2.0, IIITDM Kurnool [\[GitHub\]](#)

Python, Streamlit, QUBO, Reinforcement Learning, Clustering Algorithms

- Built a WES intelligence dashboard (Python, Streamlit) with Quantum-AI and RL Auto-Pilot algorithms that reduced predicted routing congestion by 89% and raised resource utilization from 45% to 88%.
- Deployed a predictive ML regression model (82% accuracy) to forecast Lines Per Hour, improving total operational throughput by 20%.

MLM vs AR – Language Modeling Comparison Platform

Python, FastAPI, React, Vite

- Built a full-stack platform (FastAPI backend, React/Vite frontend) comparing Masked Language Modeling (MLM) vs. Autoregressive (AR) training objectives, with dedicated experiment notebooks for reproducible benchmarking.
- Designed the backend API layer to expose model outputs and comparison metrics to the frontend in real time.

ACHIEVEMENTS & CERTIFICATIONS

- Winner, Datathon 2.0 — IIITDM Kurnool, among 40+ competing teams (WESD Optimizer).
- Participated in multiple hackathons, building and shipping projects under time constraints.
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional.
- Oracle Agentic AI Foundations Associate (1Z0-1157-26).
- Cohere Labs ML School, 2026 — Certificate.
